I. Publications and website content

II. Suggestions made at IMMPACT-I for focus of future meetings:

IMMPACT-II: Specific measures, methods of assessment, baseline characteristics, covariates, moderators, mediators, mechanisms.

IMMPACT-III: Clinically important differences, what is important to patients?, responder analyses, composite measures, what should be considered a positive trial?, ethical issues.

IMMPACT-IV: Research designs, primary vs. secondary endpoints, assessments of side-effects.

IMMPACT-V: Reporting of clinical trials, medical education.

IMMPACT-VI: Ethical and methodological aspects of placebo and no-treatment groups in pain research.
